Special Issue Introduction
Abnormalities in immune-mediated processes are heavily involved in cancer. In this special issue it was investigated the role of altered immunity in various neurological cancers such as decreased numbers of mature dendritic cells in glioblastoma patients as well as the correlation between IgE levels and prognosis in patients with brain tumors. In addition, it was discussed the potential influence of integrins in the malignant behavior of glioblastoma and application of novel therapies such as oncolytic viruses for their treatment.

Benefits

Open Access: the full-text of each published article can be accessed and downloaded from the journal website without any fee.

Rigorous Peer Review: we strictly follow international guidelines (COPE Ethical Guidelines for Peer Reviewers) and ensure rigorous peer review process.

Worldwide Readership: the readers of the journal are from more than 175 countries worldwide.

Wide Promotions: all published articles will be promoted on academic conferences, social networks for scientists or other various channels.
